Hi Jill--Before I can answer Brian's question, I need to know what ISOP and DTBX results are (sorry but I don't recognize those acronyms) and to what study is he referring, i.e., what is "the previous study"? Thanks. --Robin

Robin,

Can you answer Brian Tetlow's question below regarding tabulation/graphing of results from QC samples?

Regards,

Jill

Jill,

Good morning. Find attached an excel spreadsheet with the results for the ISOP and DTBX results for this study. Please note that two of the ISOP values were deemed unsuitable(as per our validation) because the duplicates values were unrepeatable.

Would you want me to have all of the results from the Quality Control samples tabulated and graphed as with the previous study ?

Regards, Brian
